

5G, EMF and YOUR HEALTH: **A Symposium at Elk Grove City Hall**

A symposium on EMF health effects and related issues
Tuesday - June 11, 2019 from 6:30 to 8:30pm

Elk Grove City Hall, 8400 Laguna Palms Way, Elk Grove, CA 95758

Do you know where electromagnetic fields (EMF) come from and what they can do to your body? Learn what you need to know to protect yourself and your family. Join us for an evening of presentations, questions and answers on the subject of electromagnetic fields (EMF), what they do to the body, how you can measure and shield them and reduce your exposure. We have invited representatives of AT&T and Verizon to serve on a panel which will answer questions from the audience.

**Moderated by Elk Grove Mayor Steve Ly and
Sacramento County Supervisor Don Nottoli**

The City of Elk Grove is in the process of deciding what 5G should look like and where these cell antennas should be allowed.
Residents can still have input on that.

Presentations by a certified building biologist and a medical doctor with 30 years of experience treating breast cancer patients who is familiar with the scientific research on EMF health effects.

Following the presentations there will be a panel discussion and questions from the audience. Neither the federal government (FCC or FDA) nor the wireless companies (represented by the CTIA) has any studies on the long term health and safety implications of 5G radiation. Nor are any studies planned. Thousands of studies have found serious health effects from long term exposure to 2G, 3G, and 4G electromagnetic radiation. How will this affect children's health?

Share this flyer on social media or by email.

This event is free and open to the public.

Watch the documentary film **Generation Zapped** at the Elk Grove public library on Friday, June 7, 2019 at 7:00 p.m.

Please join us for a screening of **GENERATION ZAPPED**, a new documentary film about the health risks of wireless technology. 5G is coming to Elk Grove soon. What will it look like?

GENERATION ZAPPED investigates the potential dangers of prolonged exposure to Radio Frequencies (RF) from wireless technology; its effects on our health and well-being, as well as the health and development of our children. This includes links to breast and brain cancer, to its associations with increased infertility and genetic mutations related to autism and ADHD, to newly identified illnesses, such as electrical hypersensitivity (EHS).

Hosted by Keep Cell Antennas Away From Our Elk Grove Homes

Date: Friday June 7, 2019

Time: 7:00 p.m.

Location: Elk Grove public library at 8900 Elk Grove Blvd.

RSVP/Tickets: Admission is free. The event is open to the public.

To help cover our costs we ask for a suggested donation of \$5.

Screening will be followed by a discussion and Q and A.
